

Staying home and avoiding others if you have COVID-19 symptoms or test positive is the best way to keep others safe.

You are now legally required to isolate as outlined below:

+ Fully vaccinated (2 doses or 1 dose Janssen): isolate for 5 days from the start of symptoms or until they resolve, whichever is longer, if symptoms are not related to a pre-existing illness or health condition. For 5 days following isolation, wear a mask at all times when around others outside of home.

+ Not fully vaccinated (1 dose or less): isolate for 10 days from the start of symptoms or until they resolve, whichever is longer, if symptoms are not related to a pre-existing illness or health condition.

+ If you test negative and have symptoms, you should still stay home and away from others until symptoms resolve.
